Made in India

Commando branded batteries are designed to deliver exceptional power demands of latest automotive applications, even in challenging weather conditions. The stronger, durable product range fits perfectly in majority of passenger, light, and heavy commercial vehicles. The heavy-duty automotive batteries are all-round performers for power demanding vehicles. The patented alloy grids present inside is suitable for superior starting power and instant ignition in same efficiency even in hot weather. Containers are specially designed to arrest sparks and corrosion from acid. The batteries are shipped as factory charged to avoid top-up or bench charge before use.

USP:

- **FACTORY CHARGED AND WET SHIPPED FOR BETTER RELIABILITY**
- **ZERO MAINTENANCE**
- **SEALED FOR LIFE**
- **LONGER LIFE**
- **EXCELLENT START**

FEATURES:

High-performance Plates

- Specially designed to hold charge longer.
- Superior tensile strength and improved grid alloy technology resists premature collapse at high temperature for a good balance between excellent high rate of performance and longer life.

Safety Venting

- Spill resistant and explosion proof plugs to prevent leak of electrolyte ensuring enhanced safety.

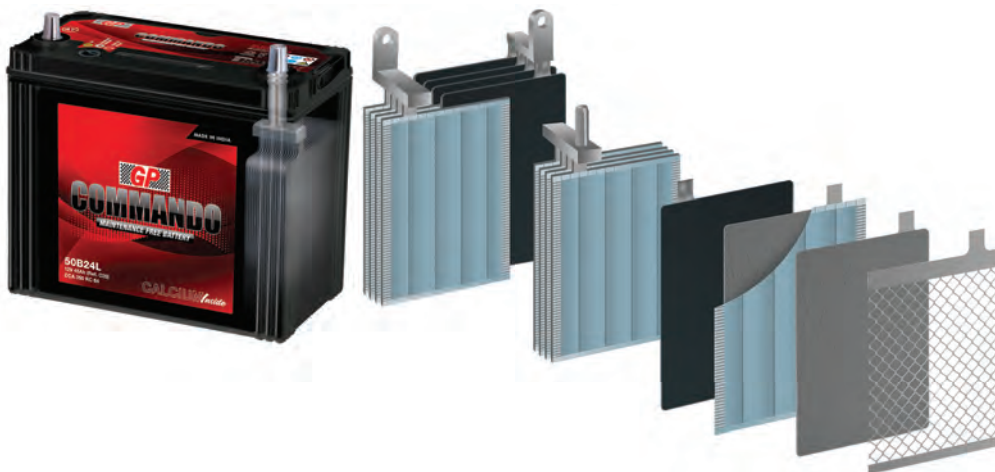

Superior Quality Separators

- Low resistance and extended self-discharge period.

Easy Handling

- Ergonomically designed lifting handles and strong light weight polypropylene casing for user convenience.

TECHNICAL SPECIFICATION FOR GP-MF COMMANDO

BATTERY MODEL		Ampere-Hour Capacity at C20 Rating	Cold Cranking Performance (Amps) CCA	Reserve Capacity (Minutes)	Dimensions (mm)
