The assurance behind every GP battery

The brand GP stands for trust. That means, wherever your journey may take you, trust in GP to take you there confidently. Our engineers are committed to offer you the power you need, with longer life, lesser corrosion and better performance. No wonder millions of cars are powered by GP each day. When you choose GP, rest assured you get the best-in-class manufacturing quality to go the distance.

- Greater starting power
- Eliminate short circuit
- Longer battery life
- Low maintenance
- Better vibration resistance

GP MAINTENANCE-FREE BATTERY

GP-MF Silver

GP-MF Silver batteries are specially designed for all locally assembled national cars. The Silver range of batteries is also recommended for drivers looking at switching to hassle-free maintenance. With the small additional price on maintenance-free batteries, drivers can enjoy the convenience of not having to top up electrolytes in the car batteries every one to three months. GP-MF Silver provides the necessary power for everyday cars.

GP-MF Gold

GP-MF Gold batteries are recommended for all Japanese cars up to 2000cc including small commercial vehicles. The Gold range of batteries has been sold in the local market since beginning 2015 and have received positive feedback from customers. GP-MF Gold provides extra power for a longer life.

GP-MF Platinum

GP-MF Platinum batteries are best value for money serving premium imported continental/European cars and Japanese cars beyond 2000cc. GP-MF Platinum provides premium power for maximum performance.

GP-MF AGM Battery *(For vehicles with start-stop functionality)*

The gold standard for all start-stop vehicles
The GP-MF AGM stands for unmatched performance and long life with 3 times the cycle life of conventional batteries. It is the perfect choice for vehicles with the highest energy demands due to heavier usage or multiple accessories and equipment.

GP-MF EFB Battery *(For vehicles with start-stop functionality)*

For superior power needs in entry-level start-stop systems
Entry-level start-stop systems are usually equipped with an EFB (enhanced flooded battery). The GP-MF EFB with 2 times the cycle life of conventional batteries meets the need of vehicles with higher than normal energy demands. So, if you are looking for a battery with extended cycle life compared to a conventional GP battery, the GP-MF EFB is your perfect choice.
